TITLE : RE-RELEASABLE ANTIBACTERIAL TRANSPARENT ADHESIVE TAPE/ SHEET

ABSTRACT : PURPOSE: To obtain the subject tape intended to prevent secondary infection from various pathogenic bacteria adhered to pay stations, the installations in hospitals and public services, etc., by providing a weakly tacky adhesive layer on the other surface of a plastic film with antibacterial solid particles on its upper layer.

CONSTITUTION: This tape is obtained by providing a re-releasable weakly tacky adhesive layer such as of an acrylic resin on the other surface of a substrate, a plastic film, having, on the upper layer of one surface thereof, aluminosilicate- based solid particles such as of zeolite bearing at least one kind of metallic ion selected from Ag, Cu and Zn ions having antibacterial action. The other objective adhesive sheet is obtained by applying a release paper to the above adhesive layer.

AB - J08218041 Aluminosilicate-based solid grain holds a metal ion having antibacterial action. A plastic film contains the aluminosilicate-based solid grain in its upper layer portion at its one surface. A re-separable antibacterial transparent pressure sensitive adhesive tape uses the plastic film as its base material. A weak-stickiness pressure sensitive adhesive layer is provided on the other surface of the base material. A re-separable antibacterial transparent pressure sensitive adhesive sheet uses the plastic film mentioned above as its base material. A weak-stickiness pressure sensitive adhesive layer is provided on the other surface of the base material. In addn., release paper is glued on the weak-stickiness pressure sensitive adhesive layer.

- USE - The re-separable antibacterial transparent pressure sensitive adhesive tape and sheet are used for a body keeping contact with the skin and prevents the skin from direct contact against the body.

- ADVANTAGE - The re-separable antibacterial adhesive tape and sheet are easily glued on and re-separated from adherends having various shapes or consisting of various materials. The tape or the sheet is easily glued on the body keeping contact with the skin. This prevents the skin from sec. infection due to various casual organisms.
